### Options

- Sloped or Flat Roof

This roof system is perfect for medium to small shows. This versatile roof can be built most anywhere including, parking lots, terraces, or open fields. The roof can be built on the ground and have a stage placed under it or if your stage is large enough, it can be set up on the stage.

The roof can be used with or without it's integral lighting that consisting of 60 par 64 lamps. If your event takes place in the evening, the lighting will cover all the action taking place underneath it or if your event takes place during the day the roof can provide sun and rain protection for your performers. The roof can also be used without the skin if your event just needs lighting (i.e. boxing or wrestling events).
